## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 35, 36, drawn to a compound, classified in class 536, subclass 1.11, 4.1.
- II. Claims 11-12, drawn to an oligomer, classified in class 536, subclass 23.1.
- III. Claims 13-21, drawn to an oligomer, classified in class 536, subclass 23.1.
- IV. Claims 22, drawn to a composition, classified in class 536, subclass 24.3.
- V. Claim 23, drawn to use of compound for synthesis, classified in class 536, subclass 25.3.
- VI. Claim 24, drawn to use of compound for labeling nucleic acids, classified in class 536, subclass 26.6.
- VII. Claim 25, 26, drawn to use of a compound for hybridization, classified in class 435, subclass 6.
- VIII. Claim 27 drawn to a chemical synthesis as a, classified in class 536, subclass 25.3.
- IX. Claim 28, drawn to method of enzymatic synthesis, classified in class 435, subclass 91.1.
- X. Claim 29-31, 33, 34 drawn to a method detecting a target, classified in class 435, subclass 6.

XI. Claim 32, drawn to method of identifying a the presence or amount of a target, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VI VII-XI are related as products and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the compound of group I for example can be used in the in the formation of oligomers and said oligomer can use in the invention VII-XI.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
